**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-15, drawn to communications system between communication devices, classified in class 359, subclass 141.
  - II. Claims 16-19, drawn to method of modification of existing communication system, classified in class 359, subclass 161.
2. The inventions are distinct, each from the other because of the following reasons:  
Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are unrelated because invention I is related to a communication system comprising of first and second cable carrying data signal between communication devices located on different landmass. Invention II is related to a method for modifying an existing communication system by disconnecting and connecting electrical power conductor.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
